## PEACE

The basic issue, blunt and unvarnished, is peace or perish. By mawkish and our civilization will not perish. Of that I am sure.

Two riverfront cottages razed in recent days

Angora cats are the largest of all pet cats.

## How to teach child to skate

The most important thing writes Yvonne Dailey, the Mont real skating-teacher, in Chateaufort is to make sure the child is wearing skates that fit well. Never, never buy skates he will "grow into."

## Strictly Fresh

Those perennial collegians are an irritating bunch. Everyone in the office gives them that Poison Ivy League look.

Grandmother would  
have liked it

## The Tommycod are Running

Old-timer, M. Sadoth Tessier, has been fishing the Ste. Anne River for 71 of his 82 years. He uses pork liver for bait. Best fishing is at high tide, which rises 12 inches at Ste. Anne.

National Film Board of Canada Photos by Gar Legrosy.

The tommycods are running, and, at the quiet Quebec town of Ste. Anne de la Pêrade, where narrow French-Canadian farms roll down like ribbons to the Ste. Anne River, a carnival spirit fills the air as townsfolk and

## Coming of Spring launches old standby... the suit

CROWN PRINCE AMIR ABDUL HAMID, late of Iraq's Ambassador, is seen in a portrait, taken at the National Press Club in Washington, D.C. The Syrian shadow of Iraq's ex-patriate to western markets is costing his country \$700,000 a day.

SUPERMAN AFTER SOLO FLIGHT—Eight-year-old John C. Marino, of Kansas City, dressed in his Superman costume, looks through broken pane in the storm door of the kitchen of his home. From here after returning from hospital and dressing in his costume, he has been to play Superman and was making him when he "broke" from the kitchen table and fell in his room. John required 30 stitches in his arm and face in his room.

FRANCOIS PENNY, a Frenchman, is seen wearing a duffel coat. Chloé, a Frenchman, is seen in a portrait, taken at the National Press Club in Washington, D.C. The Syrian shadow of Iraq's ex-patriate to western markets is costing his country \$700,000 a day.

LEONARD IN AUTOMOTIVE ECONOMY—A San Francisco man, a Frenchman, is seen in a portrait, taken at the National Press Club in Washington, D.C. The Syrian shadow of Iraq's ex-patriate to western markets is costing his country \$700,000 a day.

The coming of spring has brought that old standby, the suit, to the fore. Suits are always a favorite, and so will be the gray flannel suit, at left, which has been paired with cotton pants for a stunning effect. Another contender for space in career girl's closet is the belted wool suit, at right, with white piping trim. A white checkered suit, at right, with white piping trim. A white checkered suit, at right, with white piping trim.

## Needles expand

The first recorded ready-made garments in America were shirts for Indians, made by an Indian woman of Northfield, Massachusetts, as early as 1725, and men's breeches, likewise made of Northfield.

The first real ready-made clothing industry, however, did not develop until about a century later, as an outgrowth of the trade in men's second-hand clothing. This trade had sprung up to meet the needs of those whose stay in a port might be very short. It consisted of custom-made garments and cheap grades of ready-made garments, made in custom shops during slack seasons, supplemented the stock of second-hand clothing.

The manufacture of ready-made clothing had become a thriving business by 1815. Though it was practically limited to men's and boys' clothing of the cheaper grades and to shirts. At this time the sewing of clothing was still a hand process, which could be done easily in the home as in a shop. The earliest shops, therefore, were merely cutting rooms, and the cheaper grades of material were sent to the country to be worked up by women in their spare time. The better grades were made by city workers at their homes, or by journeymen in the custom-fitting shops when work was slack. Subdivision of labor had not yet appeared in the shops, except for the cutting, and it was not until a century later that the ready-made garment industry made vast strides forward, with the invention of the sewing machine by Elias Howe in 1846, and its improvement by Isaac M. Singer a few years later.

## Panty snatcher suspect to be questioned here

Local and Provincial police will tonight question the handily shorn suspect to local clothes line, although snatched pants were found in a rooming house in even during the winter months. — The Standard Journal, Rock Island, Mo., Jan. 17, 1937.

Considerable commotion was caused in this community last summer when clothes line were reported stolen from a woman, which was cut up and left near the scene. On one occasion, the robber entered the second-floor bedroom of a house in Rock Island and went through the drawers in a dresser while the family waited for the police. Repeated efforts by local police and state police failed to catch the man in crime.

Reports that Beaudin is alleged to have had pants of leather pants in his possession when picked up in a Derby Line and that he fits the description given local police by a woman, make him a wanted man and he will undergo questioning when he arrives back in Canada.

Although the "panty snatcher" crimes were treated with humor during the height of his career last summer, the nature of his activities suggested that he might be mentally unbalanced. Police are by no means certain that he would confine himself to clothes lines and garments.

Cold weather apparently did not deter him from his activities.

Certificates presented to Fred Durand

At Tuesday's meeting of the committee, Mayor Harrison presented a certificate to Fred Durand, a junior high school graduate from the University of British Columbia, following the successful termination of a two-year course in municipal administration.

The mayor congratulated Mr. Durand on his success and commended him for his excellent application in receiving the honor.

The Review, Revelstoke, B.C., Jan. 19, 1937.

## Local Rotary club donates \$1,000 to London treatment Centre Fund

The Rotary Club of Tillamook authorized the sum of \$1,000, representing an initial donation to the London Fund for the treatment of children's treatment Centre in London, to be given to the fund, at a recent meeting of the board of directors.—The News, Tillamook, Ore.—Jan. 17, 1937.

FLUID TEMPERATURES failed to chill the enthusiasm of four boys from Rock Island, Ontario, when they took to the water of Seneca Bay for a swim. Three 17-year-olds, Judy Maynard, Anne Handford, Sharon McBride and 12-year-old Mary Ann Proctor, swam landlubbers when they strove out for their 2 p.m. swim on Sunday, with Judy plunging beneath the icy waters in the lead. The feat was the girls had discussed for some time, finally deciding to set the Monday of January 17th for their plunge, but training White Bear could be in winter's swim up on that particular day. But instead, they swam and the swim went ahead as planned, with girls eager to reach the water and swim. Possibly on New Year's Day, they repeated the feat to be with women on the ice, and really got in at all. Judy is the daughter of Mr. and Mrs. Howard Maynard, both active White Rock Amateur Swimming Club members. Mrs. Maynard is enjoying a similar swim in cold February when her daughter's age, both Anne Handford and Mary Ann Proctor were swimming coaches last summer. Sharon McBride is also an active swimmer.

## Boston proves tough obstacle to top teams

Detroit Red Wings and Montreal Canadiens, the two clubs that are keeping right up with Boston Bruins in the 1936-37 National Hockey League championship race, have a tough time scoring against the Bruins when they enjoy a manpower advantage.

In the first third of the current season Canadiens had scored 21 goals while holding matters advantage over the opposition. They "broke" Toronto Maple Leafs by scoring nine times when the Leafs were short-handed. However, the Canadiens were able to score only once against the Boston Bruins when they had a manpower edge.

Detroit scored 14 goals with the opposition short-handed during the first third of the present campaign but only one of these was scored against the battling Bruins from Boston. Detroit had their greatest success against Canadiens. The Red Wings scored seven goals against Canadiens with a manpower advantage.

Seventy-one goals were scored during the first 70 games of the season by a team enjoying a manpower advantage. Canadiens topped the clubs with 21 goals scored this season. Detroit was second with 14. Boston Bruins, the National Hockey League leaders throughout most of these 70 games, scored 12 goals with a manpower edge. New York Rangers and Toronto Maple Leafs each scored 11 times with the opposition short-handed while the sixth-place Chicago Black Hawks scored on seven occasions.

Many goals were scored against Toronto Maple Leafs while they were short-handed than any other N.H.L. club during the first third of the present season. The Leafs had 18 goals scored against them this way. Chicago and Boston each had 15 goals notched against them. Playing short-handed, Montreal Canadiens were beaten 19 times. Detroit Red Wings were the toughest club to score against, short-handed during the first 70 games of the season. The N.H.L. in 1936-37. The Wings allowed nine goals to be scored against them while playing short-handed.

## TRY AND STOP ME!

BY BENNETT CROW

A taxi driver called that at last was wearing a hearing aid. "Then things any good?" he asked. "Sure are," said the taxi. "This one has helped me a great deal."

"Must be tough to be hard of hearing," commented the driver. "But then, everybody has something wrong with him. Take me for example: I can hardly see!"

Two brothers made a living for years playing the front end and rear end, respectively, of a horse on the stage. Then one day the rear end impersonator quit—just like that. "I was finally overcome with the unfairness of it all," he explained. "My brother was always whistling at the chorus girls and plucking them—then they'd look the back end of me!"

A newly married society gal surprised even herself one morning by getting up to serve her husband breakfast. Grilled, he blazed her on the top of the head and announced, "My darling, you are the eighth wonder of the world!" "No that so it may," warned wife, "but don't let me even catch you transmuting with any of the other seven!"

A very merry man lurched into a taxi at the New Rochelle, N.Y., station and promptly fell out of the open door onto the roadway. Fortunately stumbling in his feet, he said, "How much I owe you?"

## A TRUE EXPERIENCE

An inapt pilot fighter emerged by getting up to serve his husband breakfast. Grilled, he blazed her on the top of the head and announced, "My darling, you are the eighth wonder of the world!" "No that so it may," warned wife, "but don't let me even catch you transmuting with any of the other seven!"

## QUOTE A RIOT, MISS BLOW—A visitor to London's Institute of Contemporary Arts adjusts his glasses while taking a closer look at an abstraction by Rudi Blesh. That being said, with consent of Miss Blesh's fascination with different textures and surfaces.

A TRULY HAPPY BIRTHDAY—Charles Van Doren, TV's top single-show winner, celebrated his birthday with 21 candles on his cake and \$118,000 in TV winnings. Van Doren enters his 30th opposition in the "Twenty-One" show in add \$15,000 to his mounting pile. On his previous appearances on the program, he had previously won winnings to \$112,000. Van Doren uses backhand and fingers to his increased winnings.

## "Pork barrel" in disguise?

Down in the Maritime Provinces there seems to be a good deal of satisfaction with the Federal Government's recently instituted scheme for subsidizing the construction of trawlers and other types of craft designed for deep-sea fishing. Subsidies of \$150 per ton for such vessels have now been made available.

What reason doubt as to whether such a subsidy is really necessary in the Federal Government's decision to pay it only in respect of trawlers and similar types of fishing vessels built in the Atlantic Provinces. There is no suggestion that the subsidy should be paid in respect of trawlers built on the St. Lawrence, or along the shores of the Great Lakes.

The truth of the matter is that trawlers should be built wherever they can be done at low cost. Subsidizing trawler construction in the Atlantic Provinces is going to cost the taxpayer more, but the chances are the price of fish won't be any cheaper.

## Fertilizers for cereal grains on brome grass

It is fairly common to plough alfalfa or the alfalfa-brome grass fields and grow cereals, while allowing the brome to establish itself. The fertilization process is quite effective, however, reduced yields of cereals can be expected during this process, and in many instances, even after a summer's growth. This effect on cereal crops is likely due to a deficiency in the amount of nitrogen in the soil.

Tests using fertilizer ratios with grain after breaking brome and have been conducted by the Experimental Farm, Scott, since 1918.

From information to date it is quite evident that cereal crops grown on old brome and given large amounts of nitrogen in the form of lime, applied in the form of nitrogen with 20 pounds of phosphate per acre, had a 15 to 25 percent increase in yield and a 25 to 50 percent increase in straw over the unfertilized plot. In the case of oats, better yield increases were obtained with a 5:1 ratio, rather than a 1:1 ratio. In the case of wheat, a 1:1 ratio, that is 40 pounds of nitrogen and 40 pounds of phosphate per acre, this ratio gave a 60 percent increase in yield and a 50 percent increase in straw over the unfertilized plot. When either nitrogen or phosphate was used alone, in both these cases, yield increases were not obtained. To get optimum yields from cereal crops after breaking old brome grass a correct nitrogen and phosphate ratio must be used. To date, it appears that the best ratio of nitrogen for every one of phosphate should be used for wheat. For oats two to three times as much of phosphate should be used as for wheat. When these ratios are used, the yield of nitrogen must be kept in mind that fairly substantial extra should be applied to get optimum yields.

From past results it appears that, when after brome grass is ploughed, the yield of wheat is more satisfactory than when after brome grass is ploughed.

**Wednesday coldest**  
**Wednesday day**  
**in Bathurst**

Harold Gammon, weatherman for the Bathurst Press and Paper Company Limited, told the *Evening Light* today that January 26 was the coldest day of the season with the mercury dropping to 23 degrees below zero.

January was also a record month as far as temperatures were concerned and Wednesday's temperature broke the standing record set in 1924.—The Northern Light, Bathurst, New Brunswick, Jan. 21, 1927.

(The Times, High River, Alta.—Dec. 5, 1927)

(The Times, High River, Alta.—Dec. 5, 1927)

**Now able to walk thanks to polio fund treatment**

John Campbell dropped in to the John's physical condition, and is fairly bubbling with pleasure over the fact that the doctors have already accomplished. But equally impressive is the change on John Campbell's face, with which he looks about the same as when he was a child. In the future he expects to return to Calgary to be a headmaster and anticipate the day when he can remove at least one of the braces on his legs.

Standing erect on his crutches with an air of pride which would do credit to a Canadian, he indicated that he did not mind the long being questioned or ridiculed if it would help others in similar circumstances to realize what might be done for them.

The people of this district have been the past year, as in other years, under the influence of the League for polio patients. John Campbell is the only one of the League for polio patients who has been able to walk for the first time in his life.

John Campbell is the only one of the League for polio patients who has been able to walk for the first time in his life. **Top shorthorn**  
(The Advance, Estlin, Ont.—Dec. 15, 1926)

**Top shorthorn**  
A little belated in the pleasure of events, The News would nevertheless not like to miss the opportunity to congratulate Editor E. Scrivner of The Wesleyan News on obtaining 16 prizes in prize weekly service, which claim to making several losses in one during an afternoon and a great deal more serious. Mr. Scrivner is not like the college student who grew so old and weary that he might be qualified his qualifications, but on outstanding individual who has been in the line of the weather service for many years. He has been in the line of the weather service for many years. He has been in the line of the weather service for many years.

**Top shorthorn**  
The announcement of this office has 30 years in this particular diversified work, and knows some of the path that Mr. Scrivner has taken.

**Towns grow - troubles too**  
(The Post, Hanover, Ont.—Jan. 17, 1927)

A few years ago, nobody would have believed it, but nowadays some of the "middle-sized" towns in Ontario are beginning to take a second look at themselves and their future. These are the towns of 2,500 to 5,000 population, not the ones which have been static for the past half century, but those municipalities which have been getting in a few industries, often fairly large new factory and two or three small ones with hopes for the future.

These towns have been growing. Recent census statistics show large percentage gains in the past five years. Officers of their Chambers of Commerce want more roads and are trying to draw out of other industries which want to move away from the large cities, because their management is convinced that life in a small town offers more for their employees.

These towns are changing and that, why some of the residents are wondering whether it might not be better to try to slow down the process, rather than speed it up. Life has been pleasant in these towns, spacious and untroubled. The original town planners laid out no building lots less than 50 feet wide. They see great buildings today where cottages have been located to "show off," in high pressure business. New houses are followed by new schools, more sewers and large water tanks. Taxes go up instead of going down. In one town, the merchants charged out extra taxes for roads and services in a new subdivision. When the subdivision was complete, a new supermarket was built in it and new business went in.

Many people, especially in the small towns, have a feeling of being "left out" of the new world. One merchant summed it up: "I had hoped to live in a city. I have moved there. It's worth a thought anyway."

**O Canada - joy or lament?**  
(From The St. James Leader, St. James, Man.—Dec. 23, 1926)

Who has not shared the sentiments of Editor A. L. Horton of the *Vergilite Observer* in his comments on the singing of O Canada? Speaking of the song, he said: "I have attended the singing of O Canada, and I have seen the people of this country sing it with a fervor that is almost religious. It is a song of hope and of faith, and it is a song that should be sung by every Canadian."

**Heads up**  
(The Times, High River, Alta.—Dec. 5, 1927)

One of the minor frustrations of this life is caused by the individual whose desire or duty leads him to address an audience and whose nervousness or concern causes him to talk to his plate.

There is one particular individual, a favorite speaker of ours, who has an unusual habit of picking his punch line to knife and fork. Now this chap is witty, able and experienced in speaking and the "audes" of any talk he makes are usually the frosting on a delicious cake. A knowledge of this peculiarity allows some to take precaution of moving in close when he is on the program—but the humor and spirit of these rambling comments is completely lost to those sitting at a distance.

Many speakers again the use of microphones on a material deal has no part in their public speaking platform. In many cases we agree with these speakers for the results don't even warrant the use of the voice. But this long paper that can carry to every corner of a large hall also can be of considerable bother to those sitting close at it roars through their minds to reach the back benches.

Most halls have microphone set-ups today. Why not use them. There are styles to suit all—the plate speaker, the ceiling speaker and the man that learned that good old cliche "Stand up, speak up and shut up."

**Forewarned is forearmed**  
(From The Guide, Midland, Man.—January 17, 1927)

A small booklet recently issued by the RCMP, "Be-ware of Bad Cheques," is one which every business man should give more than a casual glance, in it an attempt is made to point out the various methods used by the cheque artist. Canadian business loses an estimated two million dollars a year from the use of bad checks, which could be prevented by the use of a few precautions.

**SASKATCHEWAN YOUNG PROGRESSIVE CONSERVATIVE**  
We need advocates of all interested young people up to the age of 35.

Will you help us?

You are doubtless in contact with young people in your area and as a Diebenicker supporter we ask that you forward their names and addresses by return mail order that they may be contacted and fully informed of the Young Progressive Conservative program.

As Mr. John Diebenicker has said many times, "The future of this Party lies with the young people."

Send the names to 300 Royal Bank Building, Saskatoon.

## NOTICE

### Preparation of Assessment Roll, 1957

**VILLAGE OF DELIA**  
NOTICE is hereby given that the Assessment Roll of the said Village of Delia, made under the provisions of the Assessment Act, has been prepared and will be thirty days be open to inspection at the office of the Secretary-Treasurer of the Village from ten o'clock in the forenoon until four o'clock in the afternoon on every day not a public holiday except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the roll or, or to the assessment of any property, or to the assessed value placed upon any property must submit written objections from the date of this notice to the Secretary-Treasurer of the Village, dated this 28th day of March 1957.

OLIVE E. MARTIN  
Secretary-Treasurer

provides for increase in so-called social security payments such as old age pensions and baby bonus, but at same time, by releasing millions of dollars into national spending stream, adds to forces of inflation in manner chiefly calculated to cancel out increases in terms of higher prices.

Total disregard for principle of need in social security payment increases means that less fortunate citizens without other means of income will be compelled to face financial stringency and hardship in order to satisfy political expediency by appearing to give something to all recipients of Government largesse.

Retirement fund proposals in Budget Speech are superficially attractive. However, such proposals would seem to be little more than "Indian gift" so long as Government pursues spending policies which stoke fires of inflation and undermine purchasing power of the dollar.

By failing to purchase corporate income tax, Finance Minister has chosen to ignore surest way of stabilizing prices. Tax levies imposed by Ottawa on business and industry are costs which loom large in prices of many goods and services.

Absent from failure to reduce taxes is the long standing feature of Budget proposals for Finance Minister's apparent disregard for

consequence of adding heavily to Government's fixed spending commitments. Such increases not only narrow opportunities for future tax relief, but also constitute serious obstacle to long problems of price control and municipalities and invite spread of double taxation.

## Local and District

Mr. and Mrs. Bob Shindler spent a few days in Calgary last week. They returned to the Calgary Bull Sale.

Mr. and Mrs. Ed. De-Mo had Sunday guests Mr. and Mrs. N. Paup, of Cambridge, Alta.

Mr. and Mrs. Wm. Gibson had as Sunday guests the latter's sister, brother-in-law, and son, of Hanna.

Mr. and Mrs. C. Greer spent a few days in Calgary last week.

Mr. and Mrs. O. Taber, and Mr. and Mrs. C. Coffey, attended the annual Jiggs dinner held in the Al Asher Temple, Calgary, on Friday eve of last week.

Spring certainly is here. Mrs. Long reported seeing a butterfly on Sunday last.

Visitors to Calgary to attend the Bull Sale were: Mr. and Mrs. D. Walker and daughter, Mrs. J. Taber and Jackie, and Jimmy and Freddie Beale.

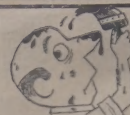

Several C.G.T. Girls traveled by bus last Saturday for the Drumbeiler C.G.T. Girls' Rally.

Mrs. Alex Beaton is a patient in the Drumbeiler Hospital.

Mr. and Mrs. Wm. Greer, Susan and Bobby, spent the week end in Calgary at the home of Mr. and Mrs. L. M. Des Jardines.

Mr. and Mrs. T. E. McColl, of Amisk, Alberta, were weekend guests of Mr. and Mrs. C. D. Greer.

Mr. and Mrs. H. Rotzell were weekend visitors at the home of Mr. and Mrs. D. H. H. H.

## DON'T BE A DRIP-DROPPER!

Get this amazing new Enamel that practically NEVER drips or spatters!

NO DRIPPING, NO SPATTERING!

Marshall-Wells Thixotropic Alkyd Enamel can give you a top-quality "smooth finish". It spreads easily, neither too thin. Stays on walls or brush even when painting indoors or out.

NEVER SAGS, RUNS OR BEADS!

Clings to the surface like it was part of it. Flows smoothly, evenly, uniformly like baked enamel. Won't settle in the run... never needs stirring. Leftovers stay fresh and usable for years.

Mrs. C. Plater is a patient in the Drumbeiler Hospital.

Mr. and Mrs. Bert Lewis were visitors at the home of Mr. and Mrs. J. Eberle over the week-end.

The Sea Cadets will hold a Navy Ball on Friday, March 29.

Several women of the Ladies' Auxiliary moved to Morris, Tuesday, to attend a Social evening.

The Ladies' Auxiliary held a Whist Drive on Wednesday night.

Mrs. Vest Shanks and nephews, Howard and Robert Thompson, were Sunday afternoon visitors in Delia.

The first Polio Salk vaccine shots were given in the Delia School Gym, on Monday afternoon, for children one to eighteen years.

Drying weather prevails at this writing (Wednesday), with cold winds and occasional freezing temperatures. Skies are partly cloudy, with occasional bright sunshine. Readings are in the low 40's around noon.

**Population Increases**

The poultry population on Canadian farms was 48,265,000 on Dec. 31st, last, an increase of 15 per cent in the past year, according to an estimate of the Dominion Bureau of Statistics. Chicken numbers at

44,910,000 were on 16 percent while turkeys numbered 3,989,000, up 19 percent.

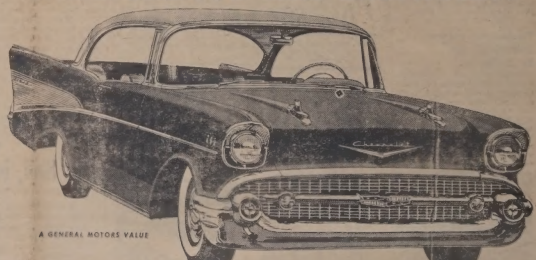

Your neighbor who solicits your financial support for the Canadian Red Cross is a volunteer.

## Cards of Thanks

I wish to thank the many kind friends and neighbors for the lovely flowers sent to me last week. Sincerely,  
Mrs. John Nelson

I wish to express my sincere thanks to my neighbors and friends for the lovely cards, flowers, fruit and presents sent to me while in Hanna and Calgary hospitals. Yours Sincerely,  
Mrs. Gertrude Hands, Delia.

## THE MORE YOU LOOK... THE MORE YOU LIKE CHEVROLET!

A GENERAL MOTORS VALUE

EYE IT... TRY IT... BUY IT!

The more you look, the more you find in Chevrolet that other cars just can't match! The new body by Fisher coachwork, the conveniences, the finer materials — no other low-cost car, no previous Chevy ever, has ever given you so much to be proud of! Come look with your eyes. Get the inside story — you've been a street-side spectator long enough!

The more you drive, the more you like Chevy's exciting edge in engineering. Even the world's most dependable Six — Chevy's best-selling line — has that vivacious Chevrolet character that leaves many a lighter

powered car behind at the stop-light! Chevy brings you five advanced engines this year — come try 'em. And try the famous Fisher handling that goes along with all that wonderful action! The more you reckon up "what you get" against "what you pay," the more you'll surely like Canada's sweet, smooth and surest favorite! Nothing comes close in value — nothing comes close in value! So come, eye, try and drive the car that's sweeping the country. The sooner you do, the sooner you'll be a happy '57 Chevrolet owner! See your Chevrolet dealer — he's making Chevy as easy to buy as it is to like!

THE MOST MODERN, EFFICIENT ENGINES IN THE WORLD!

EVERY MONTH SINCE THE 1957 CHEVROLET WAS INTRODUCED, CANADIANS HAVE BOUGHT MORE CHEVROLETS THAN ANY OTHER CAR

**Larkin & Isaac, Phone 324, Delia.**

**CANADIAN UTILITIES, LIMITED**

We trust the school teacher with our most precious possessions... our children. During their formative years, the teachers guide their character as well as teach the "Three R's." This requires a special dedication as well as special training and talents. You can make the teacher's job easier and more successful by co-operating in all ways with the educational programmes in the schools. Your active participation with the teachers, in Parent-Teacher or Home and School groups is invaluable in the encouragement and development of youth activities.

Your utility company is another community asset. Through its ideal employees, and as a long-paying citizen itself, it takes an active part in contributing to, and supporting, beneficial community interests. It stands ready to provide service beyond that which might be expected.
